Arizona Department of Economic Security
Division of Developmental Disabilities

ONE Community Working Together

*Primary funding was made available by the
Arizona Developmental Disabilities Planning Council
through contract No. ADDPC-03-08-2012*

History – Arizona Climate

- For over 20 years DDD had legal custody of eligible children/youth in child welfare system
 - Child Protective Services (CPS) investigated reports
 - Established dependency with Court
 - DDD eligible children transferred to DDD foster care
- DDD performed all child welfare functions
- DDD provided all supports/services needed regardless of Arizona Long Term Care System (ALTCS) eligibility

Background

- 2009 – Decision made to transfer all child welfare functions back to CPS
- DDD no longer had legal responsibility and unable to provide supports/services to Non-ALTCS eligible children/youth in foster care
- Created the need for more intensive transition planning to address housing, employment, and independent living skills

+

History of poor outcomes for foster youth.
Youth with disabilities have at greater risk.

“Picture of a Life” Project

- Collaborative state-wide project funded by the Arizona DD Planning Council and managed by the Sonoran UCEDD and DDD
- Targets young adults age 14-18 with DD making their transition into adulthood and aging out of the child welfare system
- Focus on non-ALTCS youth first

POL Goals

Improve transition outcomes for foster youth with DD

- Develop Persons-centered Plans (PCPs) built on strengths, dreams and choices
- Increase knowledge about options available
- Build on strengths of informal and formal supports and community networks to support young adults
- Provide opportunities to gain & practice self-advocacy/determination and independent living skills

POL Goals

- Train facilitators – grow the cadre of people able to facilitate plans in AZ
- Ultimately, to improve services for youth with DD exiting foster care in Arizona by offering a mechanism for youth to exercise meaningful choices

Major Activities

- Developed and supported implementation of PCPs for foster youth with DD
- Supported youth to attend self-advocacy & determination workshops
- Trained PCP Facilitators & professionals/ community on person-centered practices
- Project Evaluation
- Convened a State-wide Workgroup on PCP and Transition

Collaborators

- Department of Child Safety (DCS)
 - Legal Guardians of youth in foster care
 - Increase involvement of Case Managers in PCP Project
- Independent Living Centers (ILCs) – DIRECT & Ability360 + Diverse Ability Incorporated
 - Providing self-advocacy workshops > Summer **Picture YOUR Life Academy**
 - Promote informed decision making
 - Promote involvement in community

Collaborators

- Office of Children with Special Health Care Needs (OCSHCN)
 - Providing training and materials for Health Care Organizers
 - Improve long-term health and well being
- Vocational Rehabilitation (VR)
 - DDD and VR developed a “Memo of Understanding” regarding youth in foster care
 - 2 dedicated VR Counselors to work exclusively with DDD eligible youth in foster care
- Behavioral Health
 - Many of the youth have co-occurring behavioral health diagnoses

POL Youth

- Over 60 youth engaged
- 33 enrolled in POL program
- 22 plans completed

Experienced significant barriers in recruitment and retention of youth in the project

| Barriers to Participation & Data Collection | |
|---|---|
| Plans started but not completed | 7 |
| Case Closed | 6 |
| Moved to restricted facility | 3 |
| Moved out of state | 2 |
| Death | 1 |

POL Youth Demographics

| Race/Ethnicity | # |
|-------------------------------|----------|
| White/Caucasian | 15 |
| Hispanic | 9 |
| African American/Black | 6 |
| Native American/Alaska Native | 1 |

| Disability | # |
|--------------------------------|----------|
| Intellectual/Cognitive | 22 |
| Autism | 8 |
| Seizure Disorder | 3 |
| Cerebral palsy | 2 |
| Deaf | 1 |
| Other special health care need | 5 |

Youth is a Parent 1

| Gender Identity | # |
|-----------------------------|----------|
| Male | 24 |
| Female | 6 |
| Transgender, male-to-female | 1 |

| Behavioral Diagnosis | # |
|--------------------------------|----------|
| Emotional/Mood Disorder | 12 |
| Bi-polar Disorder | 6 |
| ADHD | 6 |
| Depression/Depressive Disorder | 2 |
| Post-Traumatic Stress Disorder | 2 |
| Oppositional Defiant Disorder | 1 |
| Reactive Attachment Disorder | 1 |
| Mania | 1 |

Picture YOUR Life Academy

- 33 youth with disabilities – I/DD, physical, sensory, learning, speech, and psychiatric
- 22 of youth with DD in foster care
- 10 Females | 23 Males
- 24% from underrepresented racial/ethnic groups
 - Hispanic, Native American, and African American

Picture YOUR Life Academy
SELF-ADVOCACY & DETERMINATION WORKSHOPS

Join us for a fun, 8-week summer series!
Register by May 31, 2017

Who can participate?
Youth with developmental and/or other disabilities and over the age of 14 years.
Youth who are also enrolled in foster care get priority registration; otherwise, first come, first served. Register early – there's space for 20 youth!

What will you learn?
Interactive sessions on self-advocacy, self-determination and independent living skills:

- Disability Rights History
- Making Choices and Speaking Up for Yourself
- Your Rights and Responsibilities, Voting
- Cooking & Nutrition
- Taking Charge of Your Health
- Problem-solving, Decision-making & Goal Setting
- Exploring Options for Adulthood: Education, Employment, Community Living & Engagement

Where?
DIRECT Center for Independence Conference Room
1001 N. Alvernon Way
Tucson AZ 85711
520.624.6452

When?
Tuesdays & Thursdays from 2:00 – 3:30pm
June 6th – August 1st with a break on July 4th

What will you get?
In addition to learning new skills, we will provide:

- Snacks at every session
- Certificate of participation for attending
- Experience that looks great on your resume
- The opportunity to meet other amazing people!

How to Register or get more information?
Contact Jacy Farkas | jbfell@email.arizona.edu | 520.626.2207

Picture YOUR Life Academy

- 100% Satisfied with workshops attended
- 92% learned more about Self-advocacy
- 96% learned more about Self-determination

What Youth Liked Most about PYLA:

"learning new things," "voting workshop," "the videos," "meeting new people," "making new friends"

"[The workshops] were very helpful and taught me how I have my own voice and should speak up."

POL Training

| Training | # of Trainings | # Trained |
|--------------------------------------|----------------|-----------|
| PCP Facilitator Training | 6 | 81 |
| Facilitator Webinars | 18 | varied |
| Person-centered Thinking & Practices | 8 | 327 |

| Extent of Agreement by Training Participants: | Strongly Agree | Agree | Disagree | Strongly Disagree |
|--|----------------|-------|----------|-------------------|
| I am satisfied with the knowledge and skills gained from the 2-day training. | 62% | 35% | 3% | 0% |
| As a result of this training, my knowledge of person centered thinking , planning and practices increased. | 47% | 47% | 6% | 0% |
| The training was useful and relevant to the work I do. | 67% | 33% | 0% | 0% |

POL Evaluation

Questionnaires: (YR1 – YR5)

Pre, Post, Post Annual Follow-Up (each year engaged in program)

- Youth and Facilitators

Transcriptions of facilitator trainings (YR1)

Qualitative Interviews: (YR2 & YR5)

- Youth and Facilitators

Document Review: (YR5)

Person-Centered Plan (PCP)

Individual Support Plan (ISP – DDD)

- Pre-PCP
- Post-PCP

Measurable PCP Outcomes

| Outcome | Benchmark | Achieved |
|---|-----------|----------|
| PCP has concrete steps for obtaining permanent living arrangements | 30% | 45% |
| PCP has concrete steps to plan for future employment incorporating job exploration and post-secondary education opportunities | 50% | 81% |
| Youth are better prepared for life after high school | 75% | 85% |

Key Findings: Youth

- Youth learned a more about the things they could do after they finished high school and places they can work
- Readiness for life after high school increased a after the planning process
- Youth had little knowledge about skills related to finding work and wanted more training in this area > this improved overtime
- Youth felt they could better describe and felt more comfortable talking about their health
- Youth making decisions and being able to tell others what they want or need increased

How much did person centered planning help you to do the things you want to do?

How much have you done to get what you want in your plan?

What Youth Have Said about POL

I am satisfied with this program.

30% - Strongly Agreed; 60% - Agreed

My life is better because of this program.

30% - Strongly Agreed; 70% - Agreed

70% could do more things in my community as a result of this program.

100% had more choice and control as a result of this program.

What Youth Have Said about POL

“I like it because they listen to me and will help me get a job after high school.”

“If [other youth] joined, they’d get the help they wanted like I am.”

“It taught me a lot about how I can benefit some things and benefit myself and how I can be a more responsible citizen of the US.”

Key Findings: Facilitators

Facilitators accepted: 35

Actively Planned/Completed PCPs: 15

- Facilitators found it challenging to engage and work with the different systems of care in supporting the process and resulting plan
- Overall, facilitators did not find that services were better coordinated across multiple service systems nor that there was improved communication among different systems

Key Findings: Document Review

Pilot of 6 sets of plans:

PCP, Pre-PCP ISP, Post-PCP ISP

- PCPs were more person-centered than the ISPs
- In comparison to PCPs:
 - ISPs focused more on deficits
 - ISPs addressed health, safety and risks well
 - ISPs lacked evidence of exploration
 - ISPs did not demonstrate future orientation and being youth-led

POL Challenges

- Nature of Child Welfare placements
 - Complicated personal histories – trauma, abuse
 - Issues of victims becoming perpetrators
 - Issues surrounding reunification with family members who were abusers or practice unsafe lifestyles
- Enrolled in multiple service systems: DDD, Department of Child Safety (DCS), Behavioral Health (BH), special education
 - Obtaining full participation and everyone on the same page
 - Turnover/Changes in case managers/support coordinators

Challenges

- Lack of access to the youth as most communication and scheduling had to go through guardians, group home support staff or foster parents
- Transient lifestyle – transfer to new residential placements
- Circle of support limited to paid professionals
- Lack of consistency of people of youth's life
- Time and effort needed to complete plan
- PCP implementation dependent on team

Lessons Learned

- Starting early is important
 - Hard to get young adult to refocus if already aged out
- Participation from different players difficult to obtain
- System and community barriers present significant challenges to working with youth
- Ongoing support and education for facilitators, systems of care administrators and staff, direct supports (ie., foster parents, residential staff)

PCP & Transition Workgroup

Convened to promote the use of PCP and practices in youth to adult transition across the state

- Focus on systems change efforts > cultural shift
- Training: PCP incorporated into ADE training and outreach activities

Representatives:

- Sonoran UCEDD
Employment First
- DDD
- DCS
- Dept. of Education
- AHCCCS
- SILC/Diverse Ability
Incorporated
- VR
- OCSHCN
- Behavioral Health
- Institute for Educational
Leadership, Youth Technical
Assistance Center

PCP & Transition Workgroup

- Gathered information on Best Practices & Gaps in AZ
- Identified barriers and challenges to implementing person-centered practices and planning in the systems of care that support people who have developmental and other disabilities
- Recommendations for Fostering a Person-Centered Arizona: Cultivating a Community of Inclusion, Respect and Empowerment

Final Thoughts

Many of the youth have endured challenges in their life. Despite all this, they continue to be **resilient**.

Their person-centered plan reinforces and supports their goals.

Youth appear to be more resilient if they have a supportive team, family, or network that are providing appropriate guidance at key transition points in their lives.

Success Stories

- When we first met Jack he was living in a group home with many restrictions. He had limited access to the community because of some perceived risks. Since aging out of foster care, he has accomplished many things. He got a full-time job with Waste Management, which he maintained without employment supports for close to a year. Because he is not ALTCS eligible, he lost the funding for residential placement when he turned 21 in February of this year. However, the group home manager took an interest in Jack and took him into his home to live with his family. Jack has developed a very good relationship with the family. He is currently looking for a new line of employment, and his guardian is completing a referral for Vocational Rehabilitation. He would like to work with animals.

Success Stories

- After aging out of foster care, Valerie decided to move out of state to live with her grandmother. When this didn't work out, she moved back to Arizona. She contacted DCS to enroll in the Young Adult Transitional Living program. She has been living independently, working at a call center, and is going to community college.
- Shannon, mother of two, came into care because of domestic violence in the home. Her children were taken into care and placed with Shannon's grandmother. She successfully completed her tasks in the CPS Case Plan, and her children were returned to her. When we spoke to Shannon earlier this year, she still had custody of her children, was living independently and she had a job at a call center.
